

Testimonial

Viktor Dolgopyatov

Chief Mechanical Engineer
of Omsknefteorgsintez (1996)

For a quarter of a century the COMPACS system has been in demand and successfully operated and developed as the result of the effective work of the DYNAMICS team under the supervision of Professor and Doctor of Technical Sciences - Vladimir Kostyukov.

On this anniversary year, may the DYNAMICS team have further success in production, good health, and family well-being. And a green light to the COMPACS system! God bless you!
