

Testimonial

Svyatoslav Averyanov

Director of of Gazpromneft-Omsk Refinery machinery and repair plant, JSC

We've been cooperating with DYNAMICS SPC for a long time. Our main interest is running electric motors and bearings. The COMPACS system allows us to diagnose problems quite accurately and improve the quality of repair, and decrease repair costs. We are also working on new developments and in new directions The partial discharge diagnostic technique has allowed us to overcome problems in high voltage electric motors. I wish DYNAMICS SPC further success and development.
