Isaak Bronfin

President of Omsknefteorgsintez (1996)

Thanks to DYNAMICS SPC we have moved from unpredictable destruction, accidents and emergency repairs of our machinery to a predictable system to the decommissioning system that allows us to prevent numerous accidents. And, thank God, that in the last few years we haven't had such accidents. Another matter related to the implementation of the COMPACS system is that now we have mastered the system for absolute control by our specialist personnel, thanks to whom we can control the pump compressor equipment not only on a daily basis, but for any working time. We now have the opportunity to repair the machinery not using some schedules that used to be made randomly, but judging the situation from the actual requirements. Therefore we have managed to save significant money that within the frame of inflation is hard to specify. But we believe that these increases in profitability are proportionate to not only the expenses on the system implementation, but literally exceed the expenses 10-fold. So we truly believe in further cooperation with the DYNAMICS SPC.
