

Testimonial

Vladimir Kudryashov

Chief Mechanical Engineer of Kuibyshev Refinery, JSC

Our work with DYNAMICS SPC commenced at the beginning of 2000. I can reveal a secret – this system allows you not only to monitor the equipment and its condition but also is a cost-effective one. The repair is executed not in accordance with the old method of preventive and predictive maintenance, but by means of monitoring the actual condition of the machinery. We wish you only the best. From our part we will do anything so that our co-operation will not end and last as long as it can.
