

Testimonial

Igor Pavlov

Director General
of Angarsk Petrochemical Company, JSC

We have been cooperating with DYNAMICS SPC for more than 20 years. The COMPACS system was a brand new one for us but it had an instant effect. It's safe to say that DYNAMICS SPC started the import substitution policy 25 years ago.

That's how far they looked into the future. The system is simple in performance, efficient and cost-effective. As we operate and repair this particular machinery according to its condition we are confident that the system provides results and most crucially decreases accident rate.

The most important thing about the system is its timely on-line prediction. I wish to all the management team and specialists of DYNAMICS SPC further success and development. I guarantee we will cooperate with DYNAMICS SPC as we have done before and that we will progress together. Thank you and congratulations.
