Svyatoslav Averyanov

Director of Gazpromneft-Omsk Refinery's machinery and repair shop, JSC

We've been cooperating with DYNAMICS SPC for a long time, taking into account that we are the Omsk Refinery's repair shop. Our main interest is a trial run of electric motors and bearings. The COMPACS system allows us to diagnose problems quite accurately and improve the quality of repair, and decrease repair costs. Right now we are also working together on new projects, such as a partial discharge diagnostics of high-voltage electric motors.
