## Sergey Samkov

Deputy Director General of  
Gazpromneft-Omsk Refinery, JSC

All the achievements of DYNAMICS SPC are closely connected and were brought to life at the Omsk refinery plants. Today, about 30 facilities and plants are equipped with the COMPACS vibration diagnostic system combined together with the COMPACS-Net diagnostic network. DYNAMICS SPC pioneers new technologies, and that is a serious advantage, taking into account the modern import-substitution policy and more strict requirements towards reliability, accident-free and efficient operation of machinery of refinery and petrochemical productions.
